Water Shut Off Notices: Park Drive, Steamboat Eddy, Kitchen Creek

Please be advised: Residents of Park Drive, Steamboat Eddy and Kitchen Creek can expect intermittent water service disruptions on **Monday, May 11 & Tuesday May 12th** as a result of construction associated with the replacement of 3 fire hydrants in that area.

Residents can prepare for the service disruption by filling up bathtubs or water storage containers prior 9:00am. Please be advised that when the water system is shut-down and subsequently recharged, sediment will likely be disturbed and pushed through the pipes causing discoloration to the water in your residence. In most all cases, this issue can be remedied by running your taps for a few minutes after water service has been restored to clear your system. Burping and or gurgling is also common during this period of pressurization. If problems with you water services persist after 4:00pm, please let a representative from Canyon Construction or the Band Office know and the issues will be addressed.

Canyon Contracting is committed to working with all Gitsegukla residents to insure that any inconveniences associated with our work are minimized wherever possible. Thanks to all for your continued kindness and patience as we complete our final tasks around the village.

Sincerely,
Operations,
Canyon Contracting Company
